

How to use **CalmHealthyHorses** products for best results

For overall health and longevity

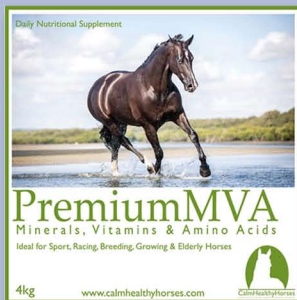

Feed daily amount all year round. Both contain selenium.

Premium MVA - Minerals, Vitamins & Amino Acids

Not only supplies all the necessary vitamins and minerals, but also all the amino acids for sustaining overall health, immune system, top-line and hoof health.

Premium NZ Minerals

Vitamins and minerals including 100% organic selenium, copper, zinc, chromium, sulphur and manganese for horses, ponies and donkeys who do not need help with any of the above.

(Non-selenium option available)

Formulated to address grass-related issues:

Amounts required will vary according to season, weather and the grass.

GrazeEzy

Helps balance the high potassium levels found in green grass. Dissolve in water you use to wet the feed. Build up according to directions on back label. Especially useful when access to grass cannot be controlled.

AlleviateC SOS

Whilst you are building up the GrazeEzy, feed SOS high dose to overcome more serious issues. Once the horse is back to normal, gradually drop the amount. Keep some on hand for adding when necessary.

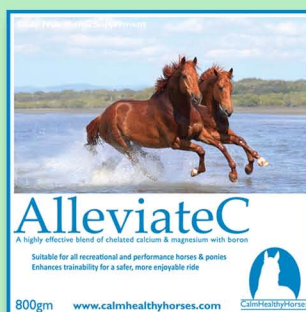

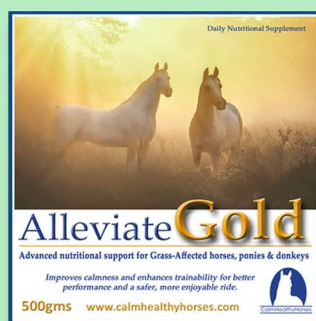

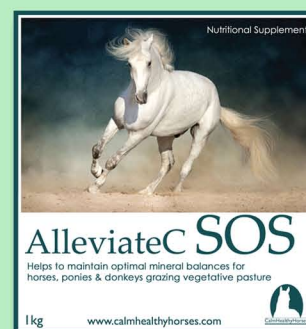

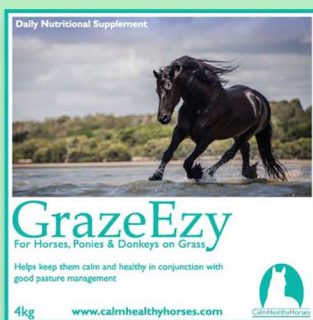

AlleviateGold

Brand new advanced formula! For horses with:

- Muscle tightness, anxiety, excitability
- Skin sensitivity / girthingness / twitching / ear-shy / head-flicking
- Gait abnormalities: loss of co-ordination/staggering/dragging toes
- Hallucinating/spooking / claustrophobia/ aggressiveness/ light sensitivity/ puffiness/ swellings

AlleviateC

Facilitates nerve and muscle function for top performance. For some horses the small dose is enough to make a real difference in overall demeanour when grass is a challenge.

Add when required:

ShapeUp

Pure amino acids with a prebiotic, these are a potassium free source of quality protein which is ideal for giving any horse a boost to their overall health.

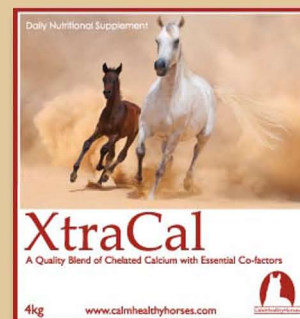

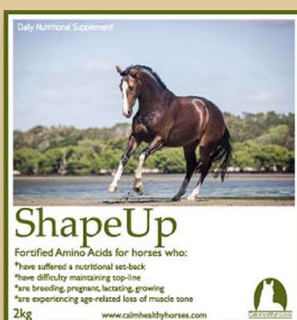

- Suitable for horses who have had a nutritional setback
- Pregnant and lactating mares, weaned foals
- Growing, elderly and Cushings horses and ponies

XtraCal

Supplies additional calcium along with vital co-factors to ensure it gets to the skeleton. For pregnant and lactating mares, growing and elderly horses or horses grazing kikuyu grass.

ToxAll

- Toxin-binding properties of Mycofix Plus 5.E which aids in the management of adverse effects that may result from the presence of mycotoxins in hard-feed
- Calming benefits of chelated magnesium and Vitamin B1
- Tissue strengthening aspects of silica

For best outcomes feed in conjunction with our "Dietary Principles for a Calm Healthy Horse"
